As a B.Tech student in Computer Science, I have gained a strong foundation in various programming languages and technologies, including Java, Python, Javascript, C & SQL. My coursework has focused on data structures, algorithms, full-stack development, database management, and software engineering. I have worked on several projects involving front-end and back-end development, using technologies such as React, Node.js, and MongoDB.

PROJECTS

JAN 02 – 26 (2023)

TRAVEL GUIDE, WEBSITE

This website is created in order to provide facilities to travelers, who are not much aware of the of the new places. My role was as a frontend and backend developer.

SEP 12– 29 (2022)

PING PONG, GAME

This game is based on Python language, in this game two players can play at same time. My role in this project was making logic and graphic for this game.
